

## PRESS RELEASE

# ECO Score: An innovative environmental standard for industry Awarded for Global Sustainability

Lima, Peru—August 30, 2023—Today, the Business Intelligence Group named Hochschild Mining one of the winners of the Sustainability Leadership Award in the [2023 Sustainability Awards](#) program. The Sustainability Awards honor those people, teams and organizations who have made sustainability an integral part of their business practice or overall mission.

Hochschild Mining has been recognized for its ECO Score, an innovative tool that enables the company to express its environmental performance numerically, considering strategic performance indicators. The tool, designed internally and launched in 2017, has not only been used to measure and monitor the company's environmental performance, but has also been included as a corporate objective, performance against which determines employee variable compensation. As a result, the ECO Score incentivizes the entire workforce to unite around a common environmental purpose: producing minerals sustainably.

"We are delighted with this global recognition, as it reinforces our strong commitment to leading in the field of environmental performance. The ECO Score has played a fundamental role in our ongoing efforts to uphold a culture of environmental responsibility and to produce minerals with the smallest possible environmental footprint", Eduardo Landin – Hochschild Mining CEO.

"We are proud to reward and recognize Hochschild Mining for their sustainability efforts," said Maria Jimenez, Chief Nominations Officer, Business Intelligence Group. "It was clear to our judges that their vision and strategy will continue to deliver results toward a cleaner, more sustainable world. Congratulations!"

### About Business Intelligence Group

The [Business Intelligence Group](#) was founded with the mission of recognizing true talent and superior performance in the business world. Unlike other [industry award programs](#), business executives—those with experience and knowledge—judge the programs. The organization's proprietary and unique scoring system selectively measures performance across multiple business domains and then rewards those companies whose achievements stand above those of their peers.
